STEP 1: The first thing you need to do is create a base sheet by pressing the + button in the bottom left of the toolbar. Then, select Edit and create a new sheet by choosing from the Layers and Sheet Type menu. Upload New File Step by Step tutorial Tutorial 23. Aug 11, 2015. © FSGGroup Limited 2015. This tutorial takes a simple 2D reinforcement design and converts it into a 3D mesh. Once you have created a 3D model, you can export it as an Autodesk® Revit® . This 3D model can be used to create a 2D reinforcement sheet. STEP 2: Once you have imported the reinforcement, you need to select all of it that is visible in the wall: Jan 23, 2015. Aug 11, 2015. © FSGGroup Limited 2015. Jul 30, 2015. Aug 19, 2015. What is the most important thing to know before you start strengthening the beam? What's the point of adding reinforcement to concrete that is already strong and has everything needed to endure a potential earthquake? How can you get a value you can live with, knowing the cost of your work? What are the most costly mistakes to avoid when planning reinforcement? Could you have reinforcement equipment in your house, without knowing it? To answer all of these questions and more, we've put together a new course. The course is simple to understand and implement. What's inside the course? Designing an earthquake strengthened house. What types of reinforcement are needed for beams and walls and how much? Step by step instructions to reinforce beams. Check the existing reinforcement by comparison with the design. Graphs showing how much the reinforcement could cost you. How to check the strength of a support beam during the job. Get all of the calculations needed to determine the value of reinforcing. Make sure you are planning right. Lesson:6 Get started The backbone to the course is our new tool called SOFiSTiK Reinforcement Detailing. It takes away all of the effort and time it takes to create a 2D reinforcement sheet for a strengthening project. Add any type of reinforcement to a wall and check its strength during the job, no design skills required. STEP 1: If you haven't done so already, log into Autodesk® Revit® . If not, don't worry
